Problem and Solution Activity Pack by Fourth and Ten | TpT

A problem statement is a concise description of an issue to be addressed or a condition to be improved upon. It identifies the gap between the current (problem) state and desired (goal) state of a process or product. Focusing on the facts, the problem statement should be designed to address the Five Ws.The first condition of solving a problem is understanding the problem, which can be done by ...

Evaluating Your Problem Statement. The problem that you select for your engineering design project is the cornerstone of your work. Your research and design work will all revolve around finding a solution to the problem you describe.

The Engineering Design Process: Define the Problem
Buffon's needle problem asks to find the probability that a needle of length l will land on a line, given a floor with equally spaced parallel lines a distance d apart. The problem was first posed by the French naturalist Buffon in 1733 (Buffon 1733, pp. 43-45), and reproduced with solution by Buffon in 1777 (Buffon 1777, pp. 100-104). Define the size parameter x by x=l/d.

Brachistochrone Problem. Find the shape of the curve down which a bead sliding from rest and accelerated by gravity will slip (without friction) from one point to another in the least time. The term derives from the Greek (brachistos) "the shortest" and (chronos) "time, delay.". The brachistochrone problem was one of the earliest problems posed in the calculus of variations.
