A primary school (or elementary school in American English and often in Canadian English) is a school for children from about five to eleven years old, in which they receive primary or elementary education. It can refer to both the physical structure (buildings) and the organisation. Typically it comes after preschool, and before secondary school. [citation needed]

If we could shrink ourselves down to the size of a 'matter particle', and we could look around inside a liquid, what would we see? We would see that the particles in the liquid are also very close together. Like solids, liquids cannot be compressed either.. Unlike solids, the particles in a liquid do not have fixed positions. They are always moving around.

Introducing the topic. In this unit, the learners will find out about what all living things have in common. The emphasis must not be on memorising facts or definitions but on activities that use process skills such as: observing differences, sorting and classifying, describing and drawing. As a teacher, you need to build the language needed for talking about concepts.

Masturbation is the sexual stimulation of one's own genitals for sexual arousal or other sexual pleasure, usually to the point of orgasm. The stimulation may involve hands, fingers, everyday objects, sex toys such as vibrators, or combinations of these. Manual stimulation of a partner, such as fingering, a handjob or mutual masturbation, is a common sexual act and can be a substitute for ...

Results (or outcomes or goals) are conditions of well-being for children, adults, families or communities, stated in plain English (or plain Spanish or plain Korean...). They are things that voters and taxpayers can understand. They are not about programs or agencies or government jargon. Results include: "healthy children, children ready for school, children succeeding in school, children ...
