FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Taxonomies that can be used in MISP (2.4) and other information sharing tool and expressed in Machine Tags (Triple Tags). A machine tag is composed of a namespace (MUST), a predicate (MUST) and an (OPTIONAL) value.

### **MISP taxonomies and classification as machine tags**

Data sources are defined in two dimensions, mobility and structure of data. First, in situ refers to data, which does not move. An example of in situ data is a Hadoop file to be processed with MapReduce.Streaming data refers to a data flow to be processed in real time, e.g. a Twitter stream. Second, structure of the data source is defined. Structured data has a strict data model.
