The Windows logo key (also known as Windows-, win-, start-, logo-, flag-, command-, or super-key) is a keyboard key which was originally introduced on the Microsoft Natural keyboard in 1994. This key became a standard key on PC keyboards. In Windows tapping the key brings up the start menu. Ctrl+Esc performs the same function, in case the keyboard lacks this key.

PostScript fonts are font files encoded in outline font specifications developed by Adobe Systems for professional digital typesetting. This system uses PostScript file format to encode font information. "PostScript fonts" may also separately be used to refer to a basic set of fonts included as standards in the PostScript system, such as Times, Helvetica and Avant Garde

PostScript fonts - Wikipedia

A foreign key is a constraint, a relationship between two tables - that has nothing to do with an index per se. But it is a known fact that it makes a lot of sense to index all the columns that are part of any foreign key relationship, because through a FK-relationship, you'll often need to lookup a relating table and extract certain rows based on a single value or a range of values.
