Android apps can be written using Kotlin, Java, and C++ languages. The Android SDK tools compile your code along with any data and resource files into an APK, an Android package, which is an archive file with an .apk suffix. One APK file contains all the contents of an Android app and is the file that Android-powered devices use to install the app.

Machine learning provides a new means of screening novel materials with good performance, developing quantitative structure-activity relationships (QSARs) and other models, predicting the properties of materials, discovering new materials and performing other materials-related studies.

Materials discovery and design using machine learning ...

Across the many fields concerned with interactivity, including information science, computer science, human-computer interaction, communication, and industrial design, there is little agreement over the meaning of the term "interactivity", although all are related to interaction with computers and other machines with a user interface.. Multiple views on interactivity exist.

There are several types of automated storage and retrieval equipment. These include: Unit-load AS/RS or Fixed-aisle (F/A) storage and retrieval systems - Machines that store large loads (usually 1,000+ pounds), typically on pallets. These systems include one or more long and narrow aisles of storage rack structure, reaching 100 feet or more tall.
