In this unit, these two topics are separated to allow students to have the opportunity to practice the algebraic skills associated with each component. Students may need to review algebra work with solving equations using square roots and substituting values into an equation with quadratic terms before they can fully access this lesson.

Unit 7 Unit Overview. In this unit, students formalize their understanding of similarity, which was informally studied prior to geometry. Students investigate and apply dilations of polygons in the coordinate plane. Similarity of polygons and triangles are explored. Triangle similarity postulates and theorems are formally proven.
