Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Positive feedback is a process that occurs in a feedback loop in which the effects of a small disturbance on a system include an increase in the magnitude of the perturbation. That is, A produces more of B which in turn produces more of A. In contrast, a system in which the results of a change act to reduce or counteract it has negative feedback. Both concepts play an important role in science ...

Positive feedback - Wikipedia

The moral implications of the evolutionary philosophy that man is simply an advanced ape are increasingly manifested in our culture. If man is an ape, then the apelike or "primal" urges that we have for violence and sexuality can be excused as coming from our evolutionary history.

Notes to the Book - Perfect Health Diet | Perfect Health Diet

An algorithm is the description of an automated solution to a problem.What the algorithm does is precisely defined. The solution could or could not be the best possible one but you know from the start what kind of result you will get.

What is the difference between a heuristic and an algorithm?

Radical behaviorism was founded by B.F Skinner and agreed with the assumption of methodological behaviorism that the goal of psychology should be to predict and control behavior.. Skinner, like Watson, also recognized the role of internal mental events, and while he agreed such private events could not be used to explain behavior, he proposed they should be explained in the analysis of behavior.
