2.1.8 Scanners. A scanner is a device that copies hard copy information (printed page, graphic image, photograph etc) into digital data, translating the information into a form a computer can store as a file. Thus it is possible to make a digitised copy of a printed page, graphic image or photograph. Simple graphic images are usually stored in a format known as GIF.

English Module 2.2

TI's WL1835MODCOM8B daughter card support the development and verification of your design. Daughter card description, features provided along with supporting documentation and resources.

Circular imports cause problems, but Python has ways to mitigate it built-in. The problem is when you run python a.py, it runs a.py but not mark it imported as a module. So in turn a.py-> imports module b -> imports module a -> imports module b. The last import a no-op since b is currently being imported and Python guards against that.
