Fern is a vascular, seedless plant that belongs to the group Pteridophyta. There are around 12 000 types of ferns that differ in size, morphology and type of habitat. Ferns can be found throughout the world. They live in shady places that provide enough moisture, such as forests, fields, swamps and areas near the streams. Fern can survive in various climates and on different altitudes.

The Miracles of Muhammad, the Prophet of Islam, are supernatural occurrences claimed by the Quran (the central religious text of Islam), ahadith (records of the words, actions, and silent approval, traditionally attributed to Muhammad), and biographies of Muḥammad during his lifetime. Almost all the miracles come from the ahadith as the vast majority are either not mentioned or their ...

Miracles of Muhammad - Wikipedia

Heredity is the passing on of traits from parents to their offspring, either through asexual reproduction or sexual reproduction, the offspring cells or organisms acquire the genetic information of their parents. Through heredity, variations between individuals can accumulate and cause species to evolve by natural selection. The study of heredity in biology is genetics
