Physics Classroom Boundary Behavior Answer

The student should be able to predict how alterations in the medium through which a wave is traveling will effect the properties of that wave. The student should be able to predict the orientation of the reflected pulse at the boundary between two media. When a pulse crosses a boundary into a ...

The year I started teaching seventh- to twelfth-grade English in Minneapolis, Prince launched his song about urban ruin, "Sign o' the Times." That song was an apt musical backdrop for the lives of my students, most of whom lived in poverty and challenged me daily. Fortunately, classroom order improved when I learned that successful classroom management depends on conscientiously executing a ...

The history of the chemical bond. When discussing the history of chemistry it's always dangerous to point to the specific origin of an idea, since by its very definition, the scientific process relies upon the gradual refinement of ideas that came before. However, as is the case with a number of such ideas, one can point to certain seminal moments, and in the case of chemical bonding, a ...

In fluid dynamics, Bernoulli's principle states that an increase in the speed of a fluid occurs simultaneously with a decrease in pressure or a decrease in the fluid's potential energy. (Ch.3) (§ 3.5) The principle is named after Daniel Bernoulli who published it in his book Hydrodynamica in 1738. Although Bernoulli deduced that pressure decreases when the flow speed increases, it was ...

Scale models offer a useful approximation of physical or chemical processes at a size that allows for greater ease of visualization. The model may be created in one (core, column), two (plan, profile), or three dimensions, and can be designed to represent a variety of specific initial and boundary conditions as needed to answer a question.
